SUBJECT : NEW BATTERY PACK

The new OTK battery pack, purposely studied for the KF category, is composed by a NiMH battery, which has the classical voltage of 12V, but an amperage of 4600 mAH, which allows to have a better starting acceleration.

The small dimensions both of the battery and the support, allow to reduce the weight of the normal battery more than 50%.

ATTENTION This battery needs a particular feeder for NiMH batteries, not included in the pack. Moreover it mustn't be exposed to temperatures higher than 60/80°C and it must be kept in a dry place.

BATTERY PACK**code : 0274.A01****Price : €220,00 + vat****BATTERY SUPPORT KIT****code : 0274.A0KIT****Price : €40,00 + vat**

We stay at your full disposal for any further information.

Best regards,
OTK KART PARTS
